

# Controls and compliance checklist

To complete the controls assessment checklist, refer to the information provided in the [scope, goals, and risk assessment report](#). For more details about each control, including the type and purpose, refer to the [control categories](#) document.

Then, select “yes” or “no” to answer the question: *Does Botium Toys currently have this control in place?*

## Controls assessment checklist

Yes	No	Control
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Least Privilege
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Disaster recovery plans
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Password policies
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Separation of duties
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Firewall
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Intrusion detection system (IDS)
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Backups
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Antivirus software
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Manual monitoring, maintenance, and intervention for legacy systems
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Encryption
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Password management system
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Locks (offices, storefront, warehouse)
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Closed-circuit television (CCTV) surveillance

- ☒ ☐ Fire detection/prevention (fire alarm, sprinkler system, etc.)

---

To complete the compliance checklist, refer to the information provided in the [scope, goals, and risk assessment report](#). For more details about each compliance regulation, review the [controls, frameworks, and compliance](#) reading.

Then, select “yes” or “no” to answer the question: *Does Botium Toys currently adhere to this compliance best practice?*

### Compliance checklist

#### Payment Card Industry Data Security Standard (PCI DSS)

Yes	No	Best practice
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Only authorized users have access to customers’ credit card information.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Credit card information is stored, accepted, processed, and transmitted internally, in a secure environment.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Implement data encryption procedures to better secure credit card transaction touchpoints and data.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Adopt secure password management policies.

#### General Data Protection Regulation (GDPR)

Yes	No	Best practice
<input type="checkbox"/>	<input checked="" type="checkbox"/>	E.U. customers’ data is kept private/secured.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	There is a plan in place to notify E.U. customers within 72 hours if their data is compromised/there is a breach.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Ensure data is properly classified and inventoried.

- |                                     |                          |                                                                                             |
|-------------------------------------|--------------------------|---------------------------------------------------------------------------------------------|
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Enforce privacy policies, procedures, and processes to properly document and maintain data. |
|-------------------------------------|--------------------------|---------------------------------------------------------------------------------------------|

### System and Organizations Controls (SOC type 1, SOC type 2)

Yes	No	Best practice
<input type="checkbox"/>	<input checked="" type="checkbox"/>	User access policies are established.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Sensitive data (PII/SPII) is confidential/private.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Data integrity ensures the data is consistent, complete, accurate, and has been validated.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Data is available to individuals authorized to access it.

---

This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

**Recommendations (optional):** In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

### **Recommended Security Measures:**

#### **1. User Access Control Implementation**

Botrium Toys should deploy **User Access Control software** to enforce:

- The **Principle of Least Privilege** (ensuring users have only the access necessary for their role).
- The **Separation of Duties** (minimizing conflict of interest and limiting access to critical functions).
- A **strong password policy** requiring passwords of at least **eight characters**, including **uppercase, lowercase, and numerical characters**.

#### **2. Database Security Enhancements**

- The IT department must implement a **secure database schema**, ensuring that sensitive data is encrypted at rest and decrypted only upon user access.
  - **Cardholder data** should never be transmitted in plaintext and must be encrypted at all transaction touchpoints.
  - Internal processing, storage, and transmission of **credit card information** must occur within a **secure environment** with minimal access privileges.
  - A **secure offsite backup solution** should be established for database resilience.
3. **Intrusion Detection System (IDS)**
- An **IDS** should be deployed to monitor and detect unauthorized access attempts.
  - A **regular testing schedule** must be established to ensure system functionality, and personnel must be trained on its use.
4. **Legacy System Maintenance Plan**
- A structured **maintenance and intervention plan** is needed to address vulnerabilities in legacy systems.
5. **Disaster Recovery & Security Drills**
- A **comprehensive disaster recovery plan** must be implemented.
  - An **annual disaster recovery drill** should be conducted, alongside **intrusion response drills**, to assess the effectiveness of security measures and response protocols.

## Conclusion

Implementing these measures will significantly reduce Botrium Toys' attack surface and enhance security, ensuring compliance with **PCI DSS** and **GDPR**. These actions will also help the company pass the **Control Checklist** and the **System and Organizations Controls Checklist** while protecting sensitive customer information.
